

InfiniLand Holding Co., Ltd.  
บริษัท อินฟินิแลนด์ โฮลดิ้ง จำกัด

# INFINITLAND COMPANY **PROFILE**

[www.infiniland.com](http://www.infiniland.com)

# About Infiniland

---

*Technology is rapidly changing the world and how we experience it. This is especially true in the business and education sectors where we are seeing new classifications emerge of learners, users, and innovators.*

Having extensive experience with varied business sectors, government bodies, and the local community, we deeply understand both the requirements and challenges of each and we believe that with the cooperation of experts in their respective fields we will be able to produce solutions through the use of state of the art technology to deal with modern day problems.

Infiniland Holding Company was established by a group of visionaries who aim to put forward proposals and related activities to promote city development, provide opportunities for the population of those in our local communities, and be globally competitive.

# Our FOUNDERS

---

The founders of Infnitland are a gathering of like-minded social innovators who come from a variety of professions united with the shared goal of improving quality of life through Blockchain Technology.

As an early adopter of blockchain technology seven years ago through Electronic Ticketing Systems, the CEO of Infnitland recently listed his company Arogo Acquisition Corporation on the NASDAQ in an effort to expand globally. This has led to the establishment of a dynamic new team of Digital Marketing specialists, Blockchain Developers, IT Architects, NFT and Game Specialists, Government body representatives, and other social and non-profit organizations.

We know that the Digital Economy will play a significant role in shaping the future and we are ready to lead the way.

# Our FOUNDERS

---

**Mr.Suradech Taweesaengsakulthai**  
CEO of Arogo Acquisition Corporation

**Kungwan Laovirojjanakul**  
Khon Kaen City Development (KKTT) Co., LTD

**Dom charoenyos**  
CEO Tokenine & DomeClou

**Apichai ruangsiripiyakul**  
Terosoft Capital Group

**Thanasit Rujjrotmethakun**  
CEO Great Dream Guild

# Our Businesses

---

InfiniLand Holding Co. has established 3 business units each focused on a key sector but all working together.

1. InfiniLand Metaverse
2. InfiniLand Token
3. InfiniLand Game and NFT

Collaboration is important not just because it's a better way to learn. The spirit of collaboration is penetrating every institution and all of our lives. So learning to collaborate is part of equipping yourself for effectiveness, problem solving, innovation and life-long learning in an ever-changing networked economy.”

Don Tapscott

# InfiniLand Metaverse

---

InfiniLand is a Play-To-Earn, Learn-To-Earn, and Build-To-Earn blockchain based world where players can explore, own and develop land, design their own, or buy and sell other NFT based assets. This is all done by playing games, solving riddles, attending and teaching courses, or designing unique assets all in a fun and safe environment.

## Vision

To become the world's leading Metaverse for innovative educational purposes.

InfiniLand aims to provide, build, and facilitate equal access to industry-leading educational channels and tools.

## Mission

To promote “Digital Tools” for learning, creation, and mastery. Blockchain Technology, Web 3.0, and the Metaverse will all soon be playing key roles not only in education, but also the workplace. We aim to ensure everyone has an opportunity to participate in this digital revolution, regardless of where they were born or financial circumstances.

## Features

InfiniLand will operate building both physical and virtual realities as well as providing services in environments created by others. We allow builders and creators a platform without anyone needing to learn any code so that brands and sectors can tailor their features and functionality to their audiences.

## Metaverse Builder

The Metaverse Builder allows you to create entire Metaverse Worlds consisting of multiple objects and environments by simply walking and talking.

## Virtual Classroom / Virtual Events

Bring your audience together in an easily accessible by smartphone and immersive 3D virtual world that creates a sense of social and physical presence. Visitors can navigate freely around the virtual event space, attend speaker presentations, visit exhibition booths, and spontaneously interact and network with others attendees. Fully customizable, you have complete control over the environment and user experience, creating new opportunities not offered by traditional 2D platforms and physical events.

## Digital Twin using XR merge

Digital twin technology combined with XR merge is being embraced as a major step forward in sustainable technology and knowledge sharing. Creating a digital twin and testing functionality with XR technology can optimize performance while reducing risks and minimizing emissions.

## Immersive Education with XR technology

Experience lessons in an immersive environment allows for not only greater enthusiasm towards study, but also better learner retention.

## Next Generation of Web 3 / Smart Contracts

We move your business into a Web3 world, employing smart contracts & blockchain technology to help make businesses of the future more trustworthy, streamlined, credible, and more profitable..

## Land and Community

Building strong online communities will keep users coming back for more. Exciting features like the Amusement Park, monthly quests and major events hosted in the Stadium provide fresh content. Those with land can build, design, establish a business, host their own private or public events, and all can be done without needing to learn a line of code.

# Infiniland Token

In the near future, the Digital Economy will be as large as the existing one and the challenge for all sectors to adapt will be just as large. With the advent of Blockchain Technology, economic models have significantly changed but there are still a lot of people who have difficulty getting access to this technology, find it too intimidating to get started, or just don't trust it. For those reasons the KGO token was created to tackle this issue.

Research conducted about being a Learning city with PMU A (Program Management Unit on Area Based Development) in 2021 and 2022, found that technology has played a significant role in developing the city and improving quality of life. Providing people the tools and training as well as easy access to technology is key to the well-being of the community.

With this in mind, the founders have decided to create a Digital Utility accessible to all named KGO Token to help increase awareness among the community and educate people about Blockchain technology in the hope that this will encourage the acceptance and a smooth transition to the new economic system in the future.

---

## **Mission**

1. To promote a better economy at local levels through the Digital Economy.
2. To promote sustainable growth of both the people and the city.
3. To empower society with technological literacy and world class innovations.
4. To facilitate the link between people in the real world with the virtual world (Metaverse).

## **Vision**

To elevate the current traditional city economic model to a digital economy

## **Core Values**

KGO, which stands for Knowledge Governance Token, is a real world Utility Token issued by Infnitland Holding Co.. This token can be used as “discount points” for products and services in the community. This token cannot be bought or sold or exchanged with Thai Baht, but rather can only be obtained from using the service in our partnered stores and businesses and from participating in activities in the city, government agencies, or educational institutions. We are currently implementing this model in the two provinces of Khon Kaen and Rayong with plans for further expansion in other provinces across the country. Furthermore, this KGO token can be transferred to Infnitland Metaverse to be used as discount coupons/vouchers in metaverse stores too.

---

## *Use cases*

KGO Token can be used as discount points for products and services in the community as well as in the Infnitland ecosystem. KGO users can collect and redeem points at any partnered stores regardless of the locations or dates. The stores can create their own campaigns, promotions, and other marketing strategies. The users can also use the token to attend classes and special events set up by Infnitland.

## *How to obtain KGO Token*

In addition to participating in activities created by Infnitland and partnered stores, KGO Token can be obtained through other social activities. The users can earn KGO tokens by contributing to society through tree planting campaigns and other environmental projects, blood donation through registered hospitals and medical institutions, and class and event participation in universities or other educational institutions.

Our company Infnitland Token does not only act as the bridge between city and technology, we also specialize in providing Tokenomics to the companies or agencies that want to create and use their own organization's special token and digital wallet.

---

## Features

Helping develop Local SMEs. There are now more than 600 shops who have partnered with KGO and more than 7,000 users across the country.

## Activity Rewards and Encouraging Education use cases

## Educating students about Web 3.0

# Our Services

---

## For Business

**KGO token** can be used as an incentive to employees or as a reward for customers. Companies do not have to invest in this blockchain system but can manage how to use the token within their own organization. These tokens can be linked to the KGO wallet and other digital wallets which will help the organization foster more customer interaction while using blockchain technology free of charge.

## Business Models

- 1.** The organization can use KGO Wallet within an organization through Infitland Token management.
- 2.** The organization can use KGO Wallet within an organization though the company management.
- 3.** Infitland Token can create the specific Token and Digital Wallet for each company.
- 4.** Infitland Token can create the specific Token and Digital Wallet for each company and link it to the KGO Wallet or other digital Wallets

# Infiniland Game and NFT

---

## NFTNext

We are a company established to drive and promote local artists as well as to improve the quality of life of people in the community. We provide an opportunity for people in the community to earn extra income through games and NFTs.

### Vision

Educate and train people to become global creators. Establish a DAO (Decentralized Autonomous Organization) and supportive NFT community both for those interested in learning more and industry experts.

### Mission

Establish Khon Kaen as a city of learning by connecting both the physical and digital urban development movements.

Encouraging talented local artists to participate in the emerging world of NFTs and bile growing the community. Create NFT projects with utility that can be distributed to and used by the general public. Create NFTs and Games to enhance people's quality of life to generate additional income or start a new career. Create activities that utilize NFTs in daily life. Provide a platform and exhibition space for NFTs in all forms showcasing the real work of the artist both regionally and globally. Enable a secure pathway for investment to those interested in building NFT projects and investing in gaming guilds.

## Products and Services

Consulting and creating NFT projects for private or various other agencies. NFT training is provided to creators and artists who are interested in creating NFT works and selling them in various marketplaces around the world.

Create physical works that are developed from Digital (NFT) work.

Develop the community through street art works such as wall murals in both the real world and the virtual world.

Create NFT to enter a new world, such as NFT silk.

Mint NFT services for artists.

Build a community for the Creators group both inside and outside the area while increasing credibility and interest in NFTs.

Representing and connecting artists under the agency for Collabs with various brands.

Develop Play2Earn games with a focus on sustainability for both guild creators and casual players.
